

Fizzle Yamaha Catch Can Installation Instructions

1. Locate the factory crankcase ventilation hose (5/8") where it connects to the factory air intake tube.
2. Undo this hose connection to the air tube and insert the supplied hose extension barb and extended hose into the factory crankcase ventilation hose.
3. Locate the two bolts securing the factory engine hoist hook to the cylinder head. Use a 10MM socket to undo these bolts.
4. Align the two holes in the catch can mounting bracket to these two bolt holes, re-insert the bolts and tighten.
5. (optional) Secure the crankcase breather hose to the factory engine cover support brackets using zip ties.
